**Temporary Suspension of Medical Certificate and Removal of Temporary**  
**Suspension of Medical Certificate.**

The Aeromedical Office of Transport Malta is hereby stating the procedure to be followed in cases where an EASA certified Flight, Cabin and ATCOs medical licence holder has been assessed and requires a temporary suspension of medical certificate.

Following notification raised by the medical licence holder and an assessment by the AME, a medical report as well as form **TM/CAD/0196** together with all supporting documentation are to be sent via email to the Chief Medical Assessor (CMO) in Malta if the pilot is a Maltese Part-FCL licence holder. Furthermore, all Maltese certified AMEs are responsible to send notification and documentation to the respective Aeromedical Sections of the Pilot's Issuing Licence Authority within 3 working days from medical assessment.

When the medical licence holder is fit again to resume duties, the AME will again be required to conduct a medical assessment on the condition that required the temporary suspension of medical certificate and report back to the CMO or the AMS section of the issuing authority. Such report as well as form **TM/CAD/0198** together with supporting documentation are to be sent via email to the CMO and/or the issuing Licencing Authority within 3 working days from medical assessment.

All forms are available on TM CAD website - Medical section.
